

Recombinant Rat Prolactin

CATALOG #: 4689-10 10 μg

4689-50 50 μg 4689-1000 1 mg

LOT#:

SOURCE: E.coli

PURITY: >95% by SDS-PAGE and HPLC

Endotoxin level is <0.1 ng per µg of Prolactin.

MOL. WEIGHT: 22.5 kDa

FORM: Sterile filtered and lyophilized from 10 mM Sodium

Phosphate, pH 8.0 + 50 mM NaCl.

RECONSTITUTION:

Centrifuge the vial prior to opening. Reconstitute in water to a concentration of 1.0 mg/ml. This solution can then be diluted into other aqueous buffers and stored at 4°C for 1 week or -20°C for future use.

STORAGE CONDITIONS:

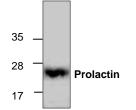

The lyophilized protein is best-stored desiccated below 0°C. Reconstituted human Prolactin should be stored at working aliquots at -20°C.

DESCRIPTION:

Prolactin (also known as mammotrophin, luterotropic hormone, and lutetropin) is a neuroendocrine hormone secreted by the pituitary gland. Its primary function is to promote and maintain lactation during pregnancy and suckling. In addition, Prolactin plays an immune-regulatory role by stimulating the activities of ornithine decarboxylase and protein kinase C, which are important for the proliferation, differentiation, and function of lymphocytes. Recombinant murine Prolactin is a 22.5 kDa globular protein containing 198 amino acid residues.

ACTIVITY:

The ED_{50} determined by the dose-dependent stimulation of the proliferation of rat lymphoma, Nb2-11 cells was found to be in the range of 0.1-1.0 ng/ml.

Cat. #: 4689-50

Purity of recombinant rat Prolactin (2 μ g) was analyzed by reduced SDS-PAGE electrophoresis.

FOR RESEARCH USE ONLY! Not to be used on humans.
