

Recombinant Mouse Complement C5a (His-Tag)

CATALOG #:	4895A-20	20 µg
	4895A-100	100 µg
	4895A-1000	1 mg
LOT #:		
SOURCE:	<i>E. coli</i>	
PURITY:	>95% by SDS-PAGE. Endotoxin level is <0.1 ng per µg of C5a.	
FORM:	Lyophilized with no additives	

RECONSTITUTION:

Centrifuge the vial prior to opening. Reconstitute to a concentration of 1.0 mg/ml in ice-cold water containing 2.5 mg/ml BSA. The solution should be aliquoted and immediately stored at -70°C for future use. Frozen/thaw will result in some loss of activity.

STORAGE CONDITIONS:

Store at -20°C or -70°C as supplied. Stable for at least 1 year. After reconstitution, store at 70°C.

DESCRIPTION:

Mouse complement C5a is a 77-amino acid peptide generated during complement activation from the α -chain of complement C5. Mouse C5a shares 60% and 82% amino acid sequence identity to human and rat C5a, respectively. C5a binds to a signaling G-protein coupled receptor (GPCR) (C5aR/CD88), inducing neutrophil chemotaxis and endothelial cell activation. It also triggers an oxidative burst in macrophages and neutrophils, and induces release of histamine in basophils and mast cells. The 9 kDa mouse C5a protein expressed in *E. coli* contains a N-terminal His-Tag sequence.

BIOLOGICAL ACTIVITY:

Mouse recombinant C5a is as active as that of serum derived C5a based on enzyme release assay of myeloperoxidase. The current lot of ED₅₀ = 1-3 nM.

FOR RESEARCH USE ONLY! Not to be used on humans.
