

Anti-Rat IL-17A Polyclonal Antibody

Catalog: PAR-300-IL17A

Specifications and Use

Target:Rat Interleukin-17ASize and Label:100 μg, UnlabeledHost and Purification:Ig Fraction of Rabbit SerumPhysical State:LyophilizedImmunogen:Full length recombinant Rat IL-17AEndotoxin Level:<0.1EUs per ug</th>Buffer:0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 with no stabilizers or preservatives

Storage: Store at 2-8°C after restoration with 0.1mL deionized water or -20°C for long term storage, avoid repeat freeze thaws.

Alternate Target Names: IL-17, CTLA-8

Description:

Interleukin-17A (IL-17A), also known as CTLA-8, is a pro-inflammatory cytokine member of a six-species family of proteins (IL-17A-17F). IL-17A is secreted mainly by activated CD4+ and CD8+ T lymphocytes and acts through its receptor, IL-17R, to induce the expression of many mediators of inflammation, most importantly, those that are involved in the proliferation, maturation and chemotaxis of neutrophils. Elevated levels of IL-17A have been associated with several conditions, including rheumatoid arthritis, airway inflammation, allograft rejection, inflammatory bowel disease, psoriasis, cancer and multiple sclerosis. Human, mouse and rat IL-17A show activity on mouse cells.

Rabbit anti-rat IL-17A is reactive with mouse IL-17A, but has minimal reactivity with human IL-17A.

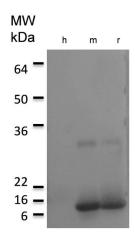

Reported Applications:

Recommended Dilution*:

Western Blot ELISA 1:1000 starting No Data

*INVESTIGATORS ARE ADVISED TO TITRATE ANTIBODIES TO REACH OPTIMAL ASSAY CONDITIONS FOR THEIR SPECIFIC NEEDS.

THIS PRODUCT IS FOR RESEARCH USES ONLY! THIS PRODUCT IS NOT FOR USE IN HUMANS!!!

Western blot analysis of 1ug of recombinant human IL-17A (100-87), mouse IL-17A (200-59) or rat IL-17A (300-24) using rabbit anti-rat IL-17A polyclonal antibody and anti-rabbit secondary antibodies. MW of rat II-17A is 14.9 kDa (under reducing conditions) and 30 kDa under non-reducing conditions
