

Osteoblast Specific Factor 1 Human E. coli

Product Data Sheet

Type: Recombinant

Source: E. coli

Species: Human

Cat. No.:

RD172044100 (0.1 mg)

Other names: Pleiotrophin, PTN, Heparin-binding growth-associated molecule, HB-GAM, Heparin-binding growth factor 8, HBGF-8, OSF-1, Heparin-binding neurite outgrowth-promoting factor 1, HBNF-1, Heparin-binding brain mitogen, HBBM

Description

Total 152 AA. MW: 17.3 kDa. N-Terminal His-tag and thrombin cleavage site 16 AA (highlighted).

Introduction to the Molecule

Pleiotrophin contains 136 amino acid residues. The sequence is very rich in cationic amino acids (24% of the residues). Lysine cluster sequences are found in the N-terminal and C-terminal ends of the structure.

The OSF-1 gene is expressed in mouse calvarial osteoblast-enriched cells and in mouse brain tissues, but not in thymus, spleen, kidney, liver, lung, testis or heart.

Pleiotrophin has the ability to promote adhesion, migration, expansion, and differentiation of human osteoprogenitor cells. The embryonic growth and differentiation factor pleiotrophin is found also in adults with inflammatory diseases. In osteoarthritis, pleiotrophin is especially expressed in early stages and its concentrations in the synovial fluid could serve as a marker for the progress of the disease. Pleiotrophin might be involved in the early-stage cartilage repair in osteoarthritis.

Research topic

Bone and cartilage metabolism, Cytokines and chemokines and related molecules

Source

E. coli

Purity

>95%

SDS-PAGE gel

12% SDS-PAGE separation of Human OSF-1

1. M.W. marker - 14, 21, 31, 45, 66, 97 kDa

2. reduced and heated sample, 10µg/lane

3. non-reduced and non-heated sample, 10µg/lane

Formulation

Filtered (0,4 µm) and lyophilized in 0.5 mg/mL in 0.1 M phosphate buffer, 0.1 M NaCl, pH 7.2

Reconstitution

Add PBS pH 7.2 to prepare a working stock solution of approximately 0.5 mg/mL and let the lyophilized pellet dissolve completely. Product is not sterile! Please filter the product by an appropriate sterile filter before using it in the cell culture.

Shipping

At ambient temperature. Upon receipt, store the product at the temperature recommended below.

Storage, Stability/Shelf Life

Store lyophilized protein at -20°C. Lyophilized protein remains stable until the expiry date when stored at -20°C. Aliquot reconstituted protein to avoid repeated freezing/thawing cycles and store at -80°C for long term storage. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after one week at 4°C.

Quality Control Test

BCA to determine quantity of the protein.

SDS PAGE to determine purity of the protein.

Applications

ELISA, Western blotting

Note

This product is intended for research use only.
