

• Rabbit Anti-Neurobeachin Polyclonal Antibody

Primary Antibodies

Background:

Neurobeachin binds to type II regulatory subunits of protein kinase A and anchors/targets them to the membrane. It may anchor the kinase to cytoskeletal and/or organelle-associated proteins. Neurobeachin, is also a neuron-specific multidomain protein of 327 kDa with a high-affinity binding site for the type II regulatory subunit of protein kinase A. Neurobeachin is peripherally associated with pleomorphic tubulovesicular endomembranes near the trans sides of Golgi stacks and throughout the cell body and cell processes. It is also found in a subpopulation of synapses, where it is concentrated at the postsynaptic plasma membrane.

Source/Purification:

KLH conjugated synthetic peptide derived from human Neurobeachin N-terminus. Was purified by Protein A and peptide affinity chromatography.

Storage: Prepared as lyophilized powder or liquid and shipped on ice. Store at -20°C for one year.

Reconstitution:

If the antibody is in liquid form, no reconstitution needed.

Reconstitution is only required for the lyophilized antibody. Please refer to the reconstitution instruction card in the package.

Size: 100ul or 100ug lyophilized

Concentration: 1ug/uL

Host: Rabbit

Reactivities: Fruit Fly,

Application:

- WB(1:100-500)
- ELISA(1:500-1000)
- IP(1:20-100)
- IHC-P(1:100-500)
- IHC-F(1:100-500)
- IF(1:100-500)
- Not yet tested in other applications.
Optimal working dilutions must be determined by the end user.

Antibody Type: Polyclonal

Isotype: IgG

Molecular Weight: 327kDa

Preservatives:

10ug/uL BSA and 0.1% NaN₃.

For research use only. CAUTION: Not for human or animal therapeutic or diagnostic use.
