bs-1119R

Rabbit Anti-PAF Polyclonal Antibody

Primary Antibodies

Background:

Platelet-activating factor, a compound that reduces inflammation by increasing permeability of blood vessels and contracting various involuntary muscles such as those in airways. It is a phospholipid with a wide range of proinflammatory actions, is immediately degraded and inactivated in vivo by PAF acetylhydrolase.

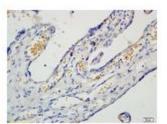

Source/Purification: KLH conjugated PAF. Was purified by Protein A and peptide affinity chromatography.

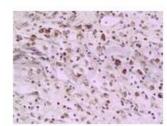

Storage: Prepared as lyophilized powder or liquid and shipped on ice. Store at -20°C for one year.

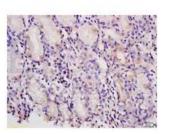

Reconstitution:

If the antibody is in liquid form, no reconstitution needed.

Reconstitution is only required for the lyophilized antibody. Please refer to the reconstitution instruction card in the package.

Size: 100ul or 100ug lyophilized

Concentration: 1ug/uL

Host: Rabbit

Reactivities: Human, Mouse, Rat,

Application:

ELISA(1:500-1000)

IP(1:20-100)

 IHC-P(1:100-500) IHC-F(1:100-500)

IF(1:100-500)

 Not yet tested in other applications. Optimal working dilutions must be determined by the end user.

Antibody Type: Polydonal

Isotype: IgG

Molecular Weight: 0.65185kDa

Preservatives:

10ug/uL BSA and 0.1% NaN3.

For research use only. CAUTION: Not for human or animal therapeutic or diagnostic use.
