## bs-9133R-Cy7

## - Rabbit Anti- phospho-GPS1(Ser474) Polyclonal Antibody, Cy7 conjugated

Conjugated Primary Antibodies

## Background:

Essential component of the COP9 signalosome complex (CSN), a complex involved in various cellular and developmental processes. The CSN complex is an essential regulator of the ubiquitin (Ubl) conjugation pathway by mediating the deneddylation of the cullin subunits of SCF-type E3 ligase complexes, leading to decrease the Ubl ligase activity of SCF-type complexes such as SCF, CSA or DDB2. The complex is also involved in phosphorylation of p53/TP53, c-jun/JUN, IkappaBalpha/NFKBIA, ITPK1 and IRF8/ICSBP, possibly via its association with CK2 and PKD kinases. CSN-dependent phosphorylation of TP53 and JUN promotes and protects degradation by the Ubl system, respectively. Suppresses G-protein-and mitogen-activated protein kinasemediated signal transduction.

Purification: Was purified by Protein A and peptide affinity chromatography.
Modification Site:
Ser474
Storage:
Aqueous buffered solution containing $100 \mathrm{ug} / \mathrm{ml}$ BSA, $50 \%$ glycerol and less than $0.09 \%$ sodium azide. Store at $20^{\circ} \mathrm{C}$ for 12 months. Protect from light. [Product without BSA and/or sodium azide is available for special order.]

## Reconstitution:

If the antibody is in liquid form, no reconstitution needed.

Reconstitution is only required for the lyophilized antibody. Please refer to the reconstitution instruction card in the package.

Size: 100ul

Concentration: lug/uL
Host: Rabbit
Reactivities:
Human,Mouse, Rat, Chicken, Dog,Bovine,Sheep,

## Application:

- IF(1:50-200)
- Not yet tested in other applications. Optimal working dilutions must be determined by the end user.

Antibody Type: Polyclonal
Isotype: IgG
Molecular Weight: 55 kDa

## Note:

For research use only. CAUTION: Not for human or animal therapeutic or diagnostic use.
