

Certificate of Analysis

Product Description

Product: Hamster Fibronectin
Catalog Number: IHMFBN
Description: Prepared from fresh hamster plasma. Ideal reagent for tissue culture studies and protein-protein interactions. Thaw the fibronectin by placing the vial in a 37°C water bath and leaving it undisturbed until completely thawed. Do not disturb the vial at any time during the thawing process. If the vial is disturbed or removed prior to complete thawing, the fibronectin will form a gel and be unusable. Mix very gently with pipette after thawing. Vortexing, excessive agitation, repeated freezing and thawing of fibronectin are not recommended.
Source: Hamster plasma
Molecular Weight: 220,000

Sample Characteristics

Lot Number: SAMPLE
Aliquot: 1 x 1.0 mg
Concentration: 10.0 mg/ml
Volume: 0.1 ml
Buffer: 0.1 M Tris-Cl; 0.15 M NaCl; pH 7.4
Form: Frozen liquid

Shipping Information

Recommended Storage: -70 C; Thaw without agitation
Shipping Conditions: Dry ice
Minimum Shelf Life: 3 years from delivery

For In Vitro laboratory use only

This material is intended for research use or for further manufacture of in-vitro diagnostic products licensed under Sec. 351 of the PHS Act. User agrees to indemnify and hold Innovative Research harmless for any use of this product other than that specifically stated.

CAUTION TO USERS: The values expressed in the attached Certificate of Analysis represent best efforts to provide accurate and reproducible data about the material. However, test methods and techniques for biologicals may produce variable results.
