

bs-0938R

• Rabbit Anti-NKG2D Polyclonal Antibody

Primary Antibody

Conjugation: Unconjugated

Gene ID: Entrez Gene: [22914](#)

Source: KLH conjugated synthetic peptide derived from rat NKG2D

Purification: purified by Protein A and peptide affinity chromatography

Storage:

Aqueous buffered solution containing 100ug/ml BSA, 50% glycerol and 0.09% sodium azide. Store at -20°C for 12 months

Target Protein: NKG2D

Background:

This locus represents naturally occurring read-through transcription between the neighboring KLRC4 (killer cell lectin-like receptor subfamily C, member 4) and KLRK1 (killer cell lectin-like receptor subfamily K, member 1) genes on chromosome 12. The read-through transcript includes an alternate 5' exon and lacks a significant portion of the KLRC4 coding sequence, including the start codon, and it thus encodes the KLRK1 protein. [provided by RefSeq, Dec 2010]

Size: 100ul

Concentration: 1ug/uL

Host: Rabbit

Reactivities: Human, Mouse, Rat,

Application:

- WB(1:100-500)
- ELISA(1:500-1000)
- IHC-P(1:100-500)
- FCM(1:100-500)
- IF(1:100-500)

Antibody Type: Polyclonal

Isotype: IgG

Note:

For research use only. CAUTION: Not for human or animal therapeutic or diagnostic use.
