• Rabbit Anti-ART4/CD297 Polyclonal Antibody, Cy7 conjugated

Conjugated Primary Antibodies

Background:

This gene encodes a protein that contains a mono-ADP-ribosylation (ART) motif. It is a member of the ADP-ribosyltransferase gene family but enzymatic activity has not been demonstrated experimentally. Antigens of the Dombrock blood group system are located on the gene product, which is glycosylphosphatidylinositol-anchored to the erythrocyte membrane. Allelic variants, some of which lead to adverse transfusion reactions, are known. [provided by RefSeq, Jul 2008].

Purification: Was purified by Protein A and peptide affinity chromatography.
