## bs-9877R-Cy7

## - Rabbit Anti-Staufen/ STAU1 Polyclonal Antibody, Cy7 conjugated

Conjugated Primary Antibodies

## Background:

STAU1 (staufen, RNA binding protein, homolog 1) is a 577 amino acid protein that contains three doublestranded RNA-binding domains and is a mammalian homolog of Staufen, a Drosophila protein that is involved in mRNA transport during oogenesis and zygotic development. Localized to the rough endoplasmic reticulum (RER) and expressed in a variety of tissues, including heart, brain, liver, lung, pancreas, kidney and placenta, STAU1 binds to both Tubulin and double-stranded RNA and is thought to play an important role in mRNA transport from the microtubule network to the RER. Additionally, STAU1 may be involved in cross-linking cytoskeletal components with RNA, an event that is important for proper mRNA positioning during translation. Alternative splicing of the STAU1 gene yields two STAU1 isoforms, designated short and long.

Purification: Was purified by Protein A and peptide affinity chromatography.

## Storage:

Prepared as lyophilized powder or liquid and shipped on ice. Store at $-20^{\circ} \mathrm{C}$ for one year. Protect from light.

## Reconstitution:

If the antibody is in liquid form, it is ready to use, no reconstitution needed.
Reconstitution is only required for the lyophilized antibody. Please refer to the reconstitution instruction card in the package.

Size: 100ul or 100ug lyophilized

Concentration: lug/uL
Host: Rabbit
Reactivities:
Human,Mouse,Rat, Chicken, Cow,Horse,

## Application:

- IF(1:50-200)
- Not yet tested in other applications. Optimal working dilutions must be determined by the end user.

Antibody Type: Polyclonal
Isotype: IgG
Molecular Weight: 63, 126kDa

## Preservatives:

10ug/uL BSA and 0.1\% NaN3

For research use only. CAUTION: Not for human or animal therapeutic or diagnostic use.
